From: Sherri Diemert, Management Analyst
Property Assessment Division

Re: Excluding the market value of exempt properties from certified values

You may notice a change in the reported market value of your taxing jurisdiction.

It has been determined that excluding the market value of exempt properties is a necessary step in our certification of values. This change does not impact your taxable value, as exempt property has no taxable values. The change in this process provides for statewide consistency in reporting to taxing jurisdictions; provides consistency with the values that Tax Policy & Research provides in legislative reports and publishes in their biennial reports, and provides the appropriate assessed values needed for any potential bonding.

If you have any questions regarding this change, please feel free to contact your local Property Assessment Office or myself at 841-2566.
